MEINL INTRODUCES NEW GENERATION X CHINA-CRASHES

TOTAL INNOVATION AND CHARACTER

Meinl cymbals announces the introduction of 15", 17" and 19" china-crashes in its Generation X line.

Meinl's award-winning Generation X series includes new and revolutionary sounds which are consciously different and aimed towards advanced, experimental and unconventional drummers who are motivated to explore something new. The large cut-out holes of the Generation X series china-crashes help to deliver an extremely trashy white-noise sound with a good amount of aggressive bite. The combination of a crash- and a china-like characteristic gives it a full-bodied sound with an oriental touch. They are made from B12 bronze alloy utilizing a high-tech computerized manufacturing process.
