## **Meinl Cymbals Introduces a 10“ Byzance Vintage Splash**

Meinl is proud to add a new 10” Splash to its Byzance Vintage Series. This series features a sand-blasted surface which gives the cymbals a soft feel and distinctive matte finish. Sandblasting also enhances the dryness of a cymbal and shortens its sustain, which are the naturally preferred characteristics of a splash cymbal.

This new Meinl splash cymbal offers a trashy splash sound, has an ultra fast response and quick decay. It fits into any music that isn't in the upper decibel levels. A great asset for any percussion set up too.
